(54) BACTERICIDE FOR VANCOMYCIN RESISTANT ENTEROCOCCUS

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a bactericide for a vancomycin resistant enterococcus.

SOLUTION: This bactericide contains hinokithiol, its metal complex or their salts as an active ingredient. Further, it is preferable to contain at least 1 kind of extract of a plant selected from Aloe, a green tea, low striped bamboo and Houttuynia cordata. An aqueous solution type containing water as a carrier is preferably used.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
